

A NON-HAZARDOUS, WATER BASED,
BIO REMEDIATION CHEMICAL FOR
HYDROCARBON ELIMINATION

ENVIROCHEM ACL™
Biodegradable Solvent

Environmentally safe replacement for chlorinated hydrocarbon solvents.
Solvent for dissolving hardened petroleum products.
Sludge generated in washing leaves a favorable environment for microorganisms to bio treat effluent.

EnviroChem ACL™ is an all natural, non-toxic, low cost alternative to petroleum solvents.
EnviroChem ACL™ is made from organic materials and is a superior solvent to Varsol®.

BENEFITS:

- Made from distillates from organic materials and is superior to Varsol®.
- Completely biodegradable: Waste water generated in the cleaning process can be discharged in sewer systems where bacteria can convert waste to inert by-products.
- Liquefies burner fuel tank bottoms, asphaltic crudes, and highly degraded petroleum products into removable and/or sellable product.

APPLICATIONS:

Hardened, highly degraded petroleum products
Wood penetrate
Carrier oil
Burner fuel tank bottoms
Asphaltic crudes

DIRECTIONS FOR USE:

Application is 6% by volume.
Apply with a spray apparatus.
